Effectiveness of the colorectal cancer (CRC) screening program in the Netherlands:

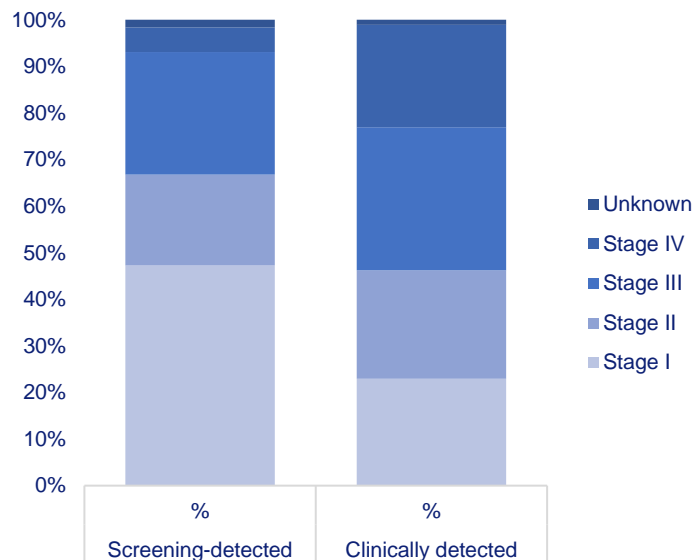

1) Shift towards detecting more early stage CRC

Effectiveness of the CRC screening program in the Netherlands:

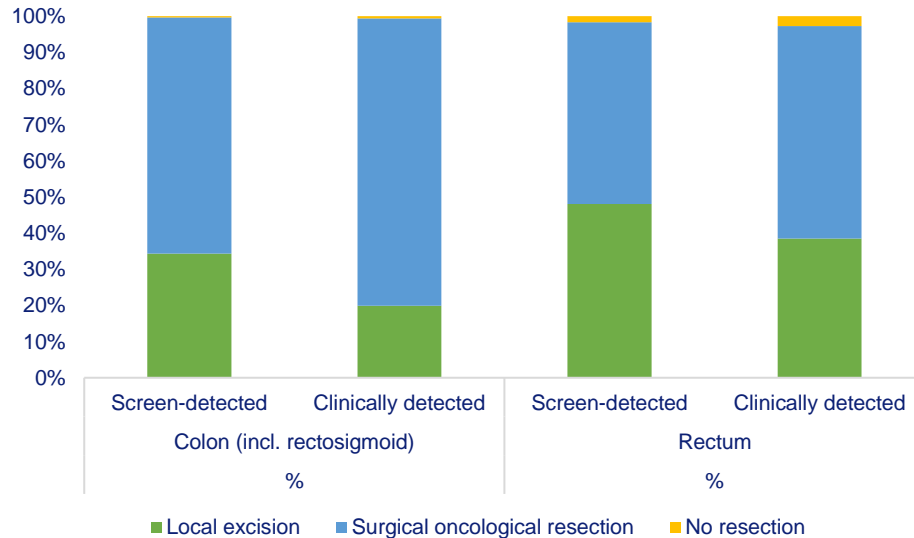

1) Shift towards detecting more early stage CRC

Effectiveness of the CRC screening program in the Netherlands:

- 1) Shift towards detecting more early stage CRC
- 2) More local excisions in screen-detected than clinically detected stage I CRCs

- 1) To describe the treatment of stage I CRCs detected within and outside the CRC screening program
- 2) To determine to what extent patient and tumor characteristics explain the different in treatment of patients with stage I CRC

All stage I CRCs diagnosed between 2008 and 2020 in the Netherlands (n=22,433)

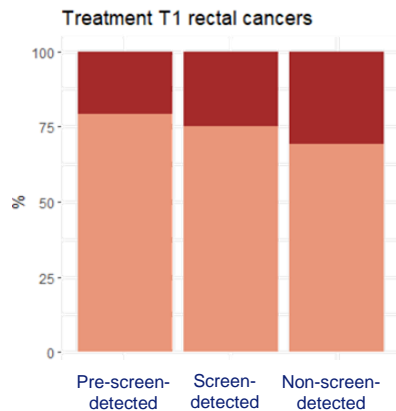

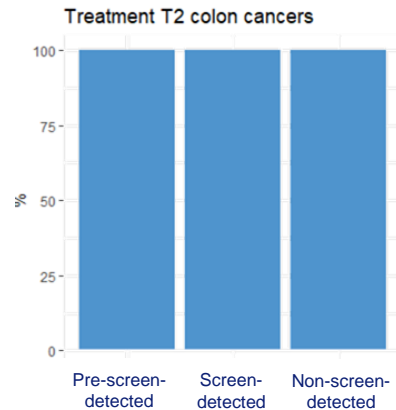

- 1) Comparison of patient, tumor and treatment characteristics of screen-detected versus non-screen-detected stage I CRCs
- 2) Join-point regression analyses to evaluate changes in treatment of T1 CRC.
- 3) Multivariable logistic regression between treatment* and patient and tumor characteristics, stratified by T-stage and tumor location

** Treatment was defined as either local excision only or surgical oncologic resection*

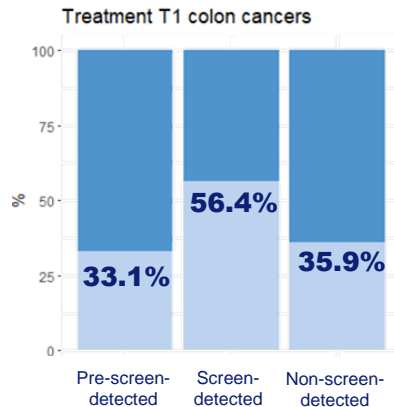

T stage distribution in colorectal cancers

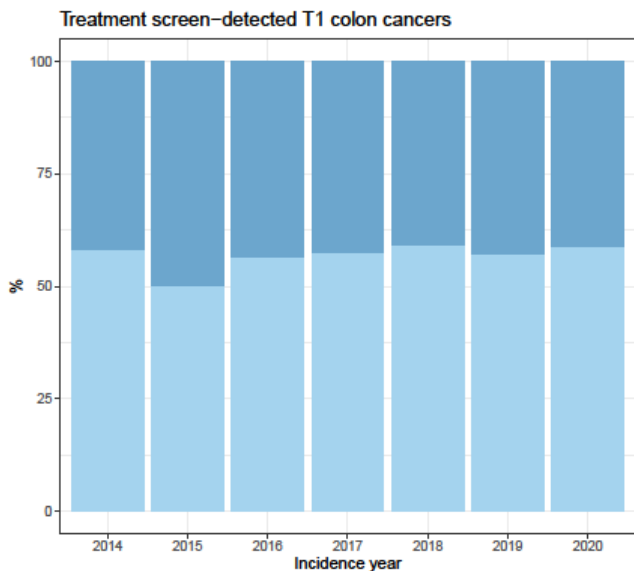

Treatment by T stage

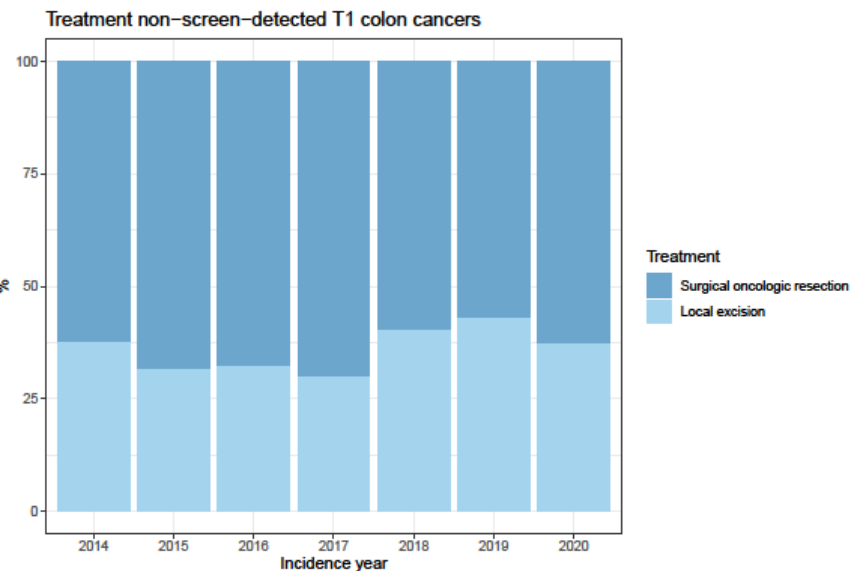

Treatment by T stage

Time trends T1 colon cancers

APC 1.5%; 95%CI 1.4% – 4.4%

APC 3.2%; 95%CI 3.1% – 9.9%

No significant changes in trends - no joint points

Time trends T1 rectal cancers

Treatment screen-detected T1 rectal cancers

APC 2014-2016: **-3.9%** (95%CI -12.4% – 5.4%)

APC 2016-2020: **3.2%** (95%CI 0.7% – 5.8%)

Treatment non-screen-detected T1 rectal cancers

APC 2.7%; 95%CI 0.6% – 6.2%

No significant changes in trends - no joint points

Regression

		T1 colon cancers, OR (95% CI)	T1 rectal cancers, OR (95% CI)

- 1) Less invasive treatment of screen-detected stage I CRC is partly explained by the higher rate of T1 compared with non-screen-detected stage I CRC.
- 2) T1 stage I CRCs were also more likely to be treated less invasively if they were detected by screening.

Thank you!
